ABOUT ME

I am currently a Fourth-year student majoring in Computer Science. I am excited about applying my skills in a junior developer role. This opportunity would allow me to further develop my capabilities, I am eager to make valuable contributions as a junior developer.

EXPERIENCE

School Project Leader

Hostel Management System (c#)

Sep-2025

This Windows Application Form Project is designed as a desktop-based system to manage essential operations such as student details, visitor information, room types, and fee management. The goal of the project is to create a user-friendly and secure platform with clear navigation across multiple pages

School Project Leader

Human-Resource-Management-System (PHP)

Feb-2025

(HRMS) built with HTML, CSS, JavaScript, PHP, and MySQL can greatly improve organizational efficiency by optimizing HR processes and effectively managing employee data. This project is 80% complete/ This is use template of the html and css.

School Project Member

SweetLayer&drinks- (J2EE)

Sep-2024

SweetLayer&drinks is a J2EE and MySQL-based web application that allows users to order cakes and drinks online. It also includes admin features for managing users and system settings.
